Faculty Administrators

Department Chair: Richard Bribiescas
richard.bribiescas@yale.edu; 203-432-3679; 10 Sachem, 202

Over the course of a year, the Chair will work with the DGS, and with ad hoc graduate student groups on a variety of issues of interest to graduate students. You should not hesitate to consult with the Chair on personal as well as general questions, if the occasion warrants.

Director of Graduate Studies (DGS):

Fall 2014 Anne Underhill
anne.underhill@yale.edu; 203-436-4258; 51 Hillhouse Avenue, 208a

Spring 2014 Anne Underhill
anne.underhill@yale.edu; 203-436-4258; 51 Hillhouse Avenue, 208a

The DGS monitors student progress through the program, approves course schedules, coordinates qualifying exams, and appoints Teaching Fellows. If you have any concerns your academic progress, registration status, a faculty member or advisor, the DGS is the one to approach.

Director of Undergraduate Studies (DUS):

Fall 2013 William Kelly william.kelly@yale.edu  203-432- 3688; 10 Sachem Street, 203

Spring 2014 Kalyanakrishnan Sivaramakrishnan
kalyanakrishnan.sivaramakrishnan@yale.edu 203-432-3684; 10 Sachem Street, 128

The DUS oversees the undergraduate major in anthropology, coordinates course scheduling, senior essays, and departmental prizes.
Administrative and Laboratory Staff

Aronsen, Gary: Laboratory Manager
gary.aronsen@yale.edu, 203-432-3692, 10 Sachem, B15

Gary oversees the Yale Biological Anthropology Laboratories. He manages collections, facility maintenance, equipment and material purchases, and coordinates laboratory research and teaching with faculty, administrator, and students.

Buskey, Constance: Receptionist / Office Assistant
constance.buskey@yale.edu, 203-432-3700, 106A

Connie handles reception, mail, the events calendar, keys, facility issues, colloquium schedules, travel, and the DVD/video teaching collection and assists the Registrar in all of these matters as they pertain to students.

Cullen, Marleen: Departmental Registrar’s Assistant
marleen.cullen@yale.edu; 203-432-3665; 10 Sachem, 102

Marleen is the assistant to the Registrar in student services. In addition, she assists with office supplies, computers, photocopying, and audio-visual equipment. She handles room reservations for courses, sections, and film screenings, and assists in reserving rooms on central campus. Also, she is the contact for student-lead colloquiums.

D’Aria, Francesco: Financial Assistant / Acting Assistant Administrator
francesco.daria@yale.edu; 203-432-6181; 10 Sachem, 108

Frank provides support to the Administrator in the Department of Anthropology and Council on Archaeological Studies regarding financial and facility matters.

DeChello, Jennifer: Administrative Assistant / Faculty Support
jennifer.dechello@yale.edu; 203-432-8403; 10 Sachem, 106A

Jennifer provides support to faculty in the Department of Anthropology by assisting faculty in all areas of work—teaching, research and financial assistance. She also assists the Administrator in all faculty related duties and the Registrar in faculty issues pertaining to students.

Dreier, Cynthia: Administrative Assistant
cynthia.dreier@yale.edu, 203-432-3701, 51 Hillhouse, 107

Cynthia is the assistant for the Council on Archaeological Studies thereby coordinating faculty and student activities. She also assists the Registrar for the Council on Archaeological Studies matters. Additionally, she assists in overseeing 51 Hillhouse and is the faculty support staff person for the faculty whose office are located in that building.

Minton, Ann: Senior Administrative Assistant / Chair’s Assistant
ann.minton@yale.edu; 203-432-3394; 10 Sachem, 203

Ann is the assistant to the Chair of Anthropology and Administrator. She coordinates faculty search committees, promotions, and reviews. Also, she coordinates faculty meetings and department events.
Phillips, Karen: Departmental Registrar
karen.phillips@yale.edu; 203-432-3670; 10 Sachem, 102
Karen coordinates, oversees, and supervises Student Services and coordinates curriculum, academic schedules, and all graduate and undergraduate student matters for the Department of Anthropology and Council on Archaeological Studies. She serves as the lead expert for the Directors of Graduate Studies and Directors of Undergraduate Studies of the department and council in all student and curriculum matters.

Salazar–Burger, Lucy: Research Associate
lucy.salazar@yale.edu; 203-436-4254; 10 Sachem, 228
Lucy is working this academic year as inventory manager for the Peabody Museum Macchu Picchu exhibition/materials.

Smith, Mary: Departmental Administrator
mary.smith@yale.edu; 203-432-366; 10 Sachem, 110
Mary deals with grants, renovations, strategic planning within the department, and numerous other matters.

Open Slots:

Assistant Administrator
This person will handle some of the finances of the department, including reviewing faculty accounts, reimbursements, and will also assist the Departmental Administrator with grants and other practical matters within the department.

Administrative Assistant / Faculty Support
This person will provide support to faculty in the Department of Anthropology by assisting faculty in all areas of work--teaching, research and financial assistance, and will also assist the Administrator in all faculty-related duties and the Registrar in faculty issues pertaining to students.

Departmental Student Assistant
Our undergraduate student assists the administrative staff with various office activities.
Graduate Program in Anthropology

Requirements for the Ph.D.

To qualify for admission to candidacy for the Ph.D., you must:

1. complete sixteen (16) term courses, at least two of them with a grade of Honors (H) and maintain an average grade of High Pass (HP);
2. demonstrate language proficiency, as determined by your advisory committee;
3. demonstrate competency in statistics/quantitative methods, as determined by your advisory committee;
4. pass the written and oral qualifying examinations;
5. submit the prospectus or field paper to your committee, which must then be approved by the faculty. (Biological anthropology & archaeology subfield students submit a prospectus, sociocultural anthropology subfield students submit a field paper.)

After being admitted to candidacy, the only requirement left to obtain the Ph.D. is to submit a dissertation, which must then be approved by the department faculty.

M.A. and M.Phil. Degrees

The Anthropology Department does not admit students who intend to obtain a terminal Master's degree. (Students interested in an M.A. in archaeology may consult the Council on Archaeological Studies [http://www.yale.edu/archaeology], which is independent of the Anthropology Department.) The M.A. degree in Anthropology is intended only for students who do not continue in the Ph.D. program. Requirements for the terminal M.A. include completion of eight (8) graduate-level term courses approved for credit in the Anthropology Department, an average grade of High Pass, and work of a quality judged appropriate by the Department for the award of the degree, subject to review by the relevant Graduate School Committee on Degrees. In reviewing an application for this degree, the Department pays special attention to the quality of written papers submitted by the applicant in course work. No anthropology student may petition for both the M.A. and the M.Phil. degrees. The academic requirements for the M.Phil. are the same as those for the Ph.D. except that neither the prospectus nor the writing of a dissertation is required.

Overview of the Ph.D. Program

There is a typical sequence of activities for timely completion of the Ph.D.:

1\textsuperscript{st} year: Coursework (4 courses per semester); summer—preliminary fieldwork or language study.

2\textsuperscript{nd} year: Coursework (4 courses per semester); qualifying exams taken during the 2\textsuperscript{nd} semester; summer—continued preliminary fieldwork or language study. \textbf{Important to note:} In the second term of your 2\textsuperscript{nd} year, you must register for ANTH 950 Preparation for Qualifying Exam. You may enter a subtitle. The instructor will be your advisor.

3\textsuperscript{rd} year: Teaching fellowship; grant writing; prospectus or field paper defended during the 2\textsuperscript{nd} semester.

4\textsuperscript{th} year: Fieldwork, usually using outside grant funding.*
5th year: Teaching fellowship; organize data and begin writing dissertation.*

6th year: Dissertation writing fellowship; write dissertation.

*In some cases, the activities of the 4th and 5th years will be reversed.

Individual programs of study may vary for several reasons, including credit received for prior graduate coursework, leaves of absence, and length of field research.

**Student Advising**

Each incoming student is assigned a provisional advisory committee, which is composed of an adviser (who acts as the committee chair) and two other Yale faculty members. Most students choose to stay with the committee assigned them, but they are free to change the membership of their committee during the first year. The adviser must be a full-time member of the Yale anthropology faculty, but the committee may contain a member from another Yale department. You must officially designate an advisory committee by submitting a “Second Year Student” form to the DGS by December 7th in the first term of your second year. If a member of the committee is on leave during that year, you should find another faculty member to fill in for the absent member.

The advisory committee’s role is to help you formulate and carry out a broad scholarly program of study and research toward the Ph.D. With the assistance of other faculty, the committee will evaluate your progress in the program and your performance on the qualifying exams. Committee members typically help you with other needs as well, such as writing recommendation letters and helping you establish contact with other scholars. You should meet with your advisory committee at least once each semester. Students are encouraged to be proactive in arranging these meetings. However, you are encouraged to meet more often with your adviser and other committee members to discuss your progress towards candidacy and any developments or difficulties in your course of study.

During a student’s third year, the advisory committee is replaced by the prospectus committee, which may or may not include the same people as the advisory committee. The prospectus committee, including the advisor and two other members of the faculty, assists you in the preparation of a prospectus / field paper or proposal for dissertation research.

**Requirements**

Students are required to take a total of 16 graduate courses over their first two years (excluding language courses—see below). Students select their courses in consultation with the DGS during the first semester and with their advisory committees during subsequent semesters. Due to the diversity of student backgrounds and interests, course requirements are generally determined on a case-by-case basis by your advisor and advisory committee. However, unless previous coursework makes a particular course redundant, some courses offered in the Department are strongly recommended, and students in each of the sub-fields are strongly advised to take core courses. Beginning with sociocultural students entering in Fall 2007, students are required to take the six-part ANTH 500, 501, 502b, 503a core course series, “Seminar in Socio-Cultural Anthropology” (see Appendix A for details; combined students in Anthropology and FES should also see Appendix B). Biological anthropology students do not have recommended core courses.
Language and Statistical/Quantitative Methods Requirements

The Department does not have a general foreign language requirement, either for admission to the program or for admission to Ph.D. candidacy. Rather, each student's advisory committee must determine the necessary level and nature of foreign language proficiency (including both scholarly languages and field research languages) to be met by the student, as well as any required competencies in statistics and other quantitative or qualitative methods. Your advisory committees will stipulate such requirements in writing to the DGS at the earliest possible stage of your program of study, specifying when and how it will be determined that you have met the requirements.

Language courses generally do not count toward the 16 courses required for candidacy. An exception is sometimes made for advanced courses in language departments if they focus on academic subjects such as literature rather than on grammar and vocabulary. As with all courses, you must discuss language courses with your advisor before enrolling in them to ensure that they will count toward the 16-course requirement and conform to an appropriate course of study.

Students who wish to study a language not represented in regular course offerings can take advantage of Yale’s Directed Independent Language Study Program (http://www.cls.yale.edu/dils/). The DILS program involves a carefully structured relationship among the student, a native-speaker, appropriate instructional materials, and an outside examiner. DILS courses do not earn course credit.

Like the language requirement, the need to demonstrate competency in statistics and quantitative methods is determined by each student’s advisory committee, and stipulated in writing to the DGS.

Honors Requirement

To meet the minimum Graduate School quality requirement for the Ph.D., you must maintain an overall grade average of High Pass (HP) and achieve the grade of Honors (H) in at least one quarter of the courses taken in each of your first two years. The Honors requirement must be met in courses other than those concerned exclusively with dissertation research and preparation. (A student who has not met the Honors requirement at the end of the second and fourth terms of full-time study will not be permitted to register.)

Qualifying Examinations

Note: Sociocultural students entering in Fall 2007 or after should refer to Appendix A for further details on the Qualifying Exams; students in the combined program of Anthropology and F&ES should also refer to Appendix B.

Qualifying exams consist of two parts: the written component, which consists of two four-hour periods over two consecutive days, and the oral component, which involves a two-hour meeting with the members of your exam committee. The written exam is usually scheduled on the last Thursday and Friday of March, and the orals during the first two weeks of April. Other scheduling arrangements may be made for students who are accelerating their progress to the Ph.D. phase of the program or, in exceptional instances, for those who must postpone exams for other reasons.

The written examination is “closed book” and “closed notes,” meaning that you are not allowed to use books, notes, or bibliographies. The first day of the written exam
normally covers the general field of your anthropological interests (archaeology/prehistory, biological anthropology, sociocultural/linguistic anthropology, or some approved combination thereof), while the second day focuses on thematic topics and fields of scholarship related to your proposed dissertation research. Students may choose to compose their written responses either by computer or by hand; most students favor writing by computer.

The scope of the exams and the composition of the exam committee must be established at the start of your second year. In consultation with your advisory committees, you will decide on the academic areas to be covered in the exams and select one or two additional examiners to assist in the preparation of bibliographies and administration of the exams. The additional examiners may be from outside the Department or even the University, and in some instances they may be scholars not affiliated with any university. All students will be expected to have at least four examiners on their exam committees. In the term before your exams are to be taken, you must submit a “Second Year Form,” identifying the members of your advisory committee, your additional examiners, and your proposed exam fields, to the DGS for departmental faculty approval.

The purpose of the qualifying examination is to help the faculty assess your scholarly progress since entering the program at Yale, and it is only one of the means whereby that assessment is made. Although a high quality of performance is expected and demanded of all students, each written and oral examination is tailored to your particular interests, goals, and previous studies. There is no fixed syllabus, course of study, or exam questions applicable to all students. Because students come to the Ph.D. program with diverse backgrounds and degrees of preparation, and because we normally allow only two years of full-time study before the qualifying exams must be taken, students come variously prepared to the examination experience and are thus expected to perform variously in the course of it. Therefore, advancement to the dissertation research phase of the Ph.D. program depends on faculty evaluation of the totality of the student's performance and progress, and not on examination performance alone. For that reason, a student whose performance on the qualifying exams is judged unsatisfactory is not permitted to retake the examinations. However, a student may pass their exams “conditionally,” with stipulations to take supplementary coursework or directed readings in areas of weakness.

**Dissertation Prospectus / Field Paper**

Note: Sociocultural students entering in Fall 2007 or after should refer to Appendix A for further details on the Dissertation Prospectus or Field Paper; students in the combined program of Anthropology and F&ES should also refer to Appendix B.

Admission to candidacy for the Ph.D. requires the preparation of a full-scale research proposal. Ideally, the prospectus is completed during the semester following the qualifying exams, but must be completed and accepted by the faculty no later than its penultimate meeting of the Spring Term of student’s third year. The prospectus should be prepared in consultation with the student’s dissertation supervisor and at least two other scholars (one of whom must be a regular member of the Department faculty). These scholars shall constitute the prospectus defense committee, to which the student must present a written version of about 2000-2500 words, prepared in a format appropriate to the subfield. The committee will convene an oral examination and discussion of that
prospectus with the student. The committee may require revisions of this prospectus and additional defense meetings before giving final endorsement.

The prospectus should present your best judgment and intentions regarding the proposed dissertation before leaving for fieldwork or otherwise commencing your research. You are of course free to make necessary adjustments and changes to your project as the research proceeds and the dissertation is written. However, if the changes are substantial, you may be required to write and present another prospectus.

You should not initiate fieldwork or other research for the dissertation until the prospectus has been approved and you have been advanced to candidacy.

Please see the following website for complete details for preparing and defending the dissertation prospectus: http://www.yale.edu/anthro/yale_anthro/graduate_program.html

**Human Research Protection Program and Institutional Animal Care and Use Committee**

All research involving human subjects must be reviewed and, if necessary, approved by the Human Research Protection Program to ensure that the rights and welfare of research participants are protected. Information on application and the review process, deadlines, as well as all necessary forms can be found at http://www.yale.edu/hrpp

If the research involves vertebrate non-human animals, approval must be obtained from Yale’s Institutional Animal Care and Use Committee. Information on the guidelines for research and the approval process can be found at http://iacuc.yale.edu/

**Dissertation Progress Reports (DPR)**

After admission to candidacy, an annual progress report is required from every student. The progress report must be received by the Graduate School by May 1st, if a business day, or the next business day after it, approved by the student's advisor and the DGS. Therefore, it must be submitted to your advisor and the DGS well in advance of this deadline. The progress report must include a detailed report on the progress you have made on your dissertation during the past year and a projected timetable for its completion. The DPR is completed and submitted on-line at http://www.yale.edu/sis/dpr.

While in the field, it is important for you to keep track of this and other deadlines, as failure to do so may (and often does) lead to significant administrative complications, including registration holds (see below—“Registration Holds”) and it could ultimately result in withdrawal from the doctoral program.

**Submitting the Dissertation**

The Graduate School awards degrees twice a year—in November or December and in May. Deadlines for submitting the dissertation change slightly each year, so you are advised to check the academic calendar for the exact date. Useful information can be found in the dissertation booklet “Preparation and Submission of the Doctoral Dissertation,” which is available from the Graduate School at 140 HGS, or from Student Services, 10 Sachem, 102.

Students planning to submit their dissertation should notify the Departmental Registrar at least two months before the submission date they intend to submit. They should also
view and print the dissertation submission packet at http://www.yale.edu/graduateschool/academics/forms/dissertationChecklist.pdf. The forms can only be printed and completed by the student.

It is important to notify the Departmental Registrar two months in advance of submission, so that your committee can be approved at the faculty meeting before submission. You will be submitting a Notification of Readers form (NOR) along with your dissertation and other forms, which is prepared by Student Services and signed by the DGS, who bases approval on faculty approval obtained at the faculty meeting.

Dissertations must be written in and submitted in English, except in cases where special permission has been granted in advance. There is no formal defense of the dissertation at Yale, although students are encouraged to arrange an informal presentation of their research through one of the department's colloquia.

**Financial Resources**

**Summer Research & Language Studies**

During the first and second year students normally conduct pre-dissertation exploratory research or language study relevant to their projected dissertation project.

**Grants**

Students rely on various kinds of grants—including pre-dissertation, dissertation, language study, and conference grants—throughout their studies. Numerous grants are available through the Department, through other programs at Yale, and through outside sponsors and funding sources. Students typically start applying for dissertation grants at the beginning of their third year. General information about the many grants available at Yale can be found at the Yale Graduate School's Financial Aid and Fellowships pages [http://www.yale.edu/graduateschool/financial/index.html](http://www.yale.edu/graduateschool/financial/index.html). Some grants must go through the Office of Grant and Contract Administration [http://www.yale.edu/grants/](http://www.yale.edu/grants/), so you are advised to consult these websites carefully, and confer with the registrar and departmental administrator well in advance of the deadline to discuss the budget for the grant and the process. Students are highly encouraged to consult with their advisors and committees on potential funding sources.

**Anthropology Departmental Grants**

Policies & Procedures along with the applications for departmental grants are available on the departmental website listed under the Graduate Program. These grants include:

*The Josef ALBERS Traveling Fellowship.* This grant is for travel and research expenses in connection with scholarly research involving pre-Columbian art and artifacts from Mesoamerica, Central America and South America.

*The Michael COE Fund.* This is a research fellowship available to graduate students who plan foreign travel to conduct archaeological research during the summer. This grant is intended to help defray travel expenses.
The Augusta HAZARD Fund. This is a research fellowship available to graduate students who plan foreign travel to conduct archaeological research during the summer. This grant is intended to help defray travel expenses.

The SCHWARTZ Family Foundation Fund. These grants enable doctoral students to attend Anthropological conferences. Priority is given to registered students in their first to sixth year of study. The limit is $1000 annually, and $5000 lifetime per student. The department will provide additional funding up to $500.00 to match other awards.

The WILLIAMS Fund. This fund provides grants ranging from a few hundred dollars to a lifetime total of $3,000 to support pre-dissertation research and study.

Non-Departmental Yale Grants

Yale MacMillan Center (formerly Yale Center for International and Area Studies, YCIAS). The MacMillan Center and its affiliated councils and programs offer a number of grants for international research, (http://www.yale.edu/macmillan/graduate.htm).

The Yale Institute for Biospheric Studies (YIBS) Center for Field Ecology. YIBS provides five Ph.D. students in various programs, including Anthropology with small grants of up to $3,000 to allow them to gather pilot data necessary to apply for more substantial funding. The grants are aimed at students in their first and second years, (http://www.yale.edu/yibs/).

Non-Yale Grants

For their dissertation research, anthropology students typically rely on outside research grants. This is not a comprehensive list. Again, consult with your advisor. Among the grants most commonly applied for are:

Fulbright-Hays Doctoral Dissertation Research Abroad (http://www.ed.gov/programs/iegpsddrap/index.html);

Fulbright IIE (http://www.fulbrightonline.org/us/home.php);

Great Ape Trust (http://www.greatapetrust.org)

Leakey Foundation (http://www.leakeyfoundation.org);

National Science Foundation (http://www.nsf.gov/);

Social Science Research Council (SSRC) International Dissertation Research Fellowship (http://www.ssrc.org/programs/idrf/); and

Wenner-Gren (http://www.wennergren.org/).

Applications for the Fulbright grants are available through the appropriate dean at the Graduate School. Each of these grants is highly competitive, so writing a successful application can take time and specific knowledge. Students are encouraged to consult with faculty and other students and who have successfully applied for these grants and to read successful applications for guidance. Most years, students organize departmental workshops allowing students writing grant applications to discuss the process with other students and faculty.
Teaching Fellowships

Participation in the Teaching Fellowship (TF) Program, http://www.yale.edu/graduateschool/academics/program.html is an obligatory part of all Yale Ph.D. programs and is designed to help you become an effective teacher. You will typically start teaching in your third year, after completing your coursework and qualifying exams. International students graduating from non-English-speaking undergraduate institutions must pass the SPEAK test in order to a teaching fellowships at the full teaching level. If they have not yet passed the SPEAK test they can only be assigned as a Grader, with no student contact.

Students in their third and fourth year who are registered full-time and in residence are given priority in teaching assignments. If during these two teaching years a student's compensation as a teaching fellow is less than the standard stipend, the Graduate School provides a supplemental university fellowship to bring the annual fellowship to the level of the department's standard stipend.

Students in their fifth and sixth years may be assigned teaching fellowships based on need and availability of courses, but they will not receive the supplemental university fellowship they received during their teaching years. Students holding a University Dissertation Fellowship (UDF, see below) are not eligible for teaching fellowships. Beyond the sixth year, teaching fellowships are awarded at the discretion of the department.

A link to the Teaching Fellows handbook can be found here: http://www.yale.edu/graduateschool/teaching/forms/Becoming_Teachers.pdf

Deferral of Teaching Year

During your fourth year, you may request to defer your teaching fellowship into the fifth or sixth year for compelling academic reasons—for example, if you receive an external fellowship or you will not be in residence due to field research. Students who wish to defer their teaching fellowship should apply in writing and obtain the approval of the DGS and the Associate Dean of the Graduate School before the beginning of the fourth year. If the deferral is approved, the student will have the same status as a student in a teaching year (years 3-4). Under no circumstances may a student defer a teaching year beyond the sixth year, and all students must still complete the University Dissertation Fellowship by the end of the sixth year.

Health Preparation for Travel

The Health Services Travel Clinic provides information and immunizations for individuals traveling abroad (http://www.yale.edu/yhp/med_services/int_travel.html). The clinic is “fee-for-service” and not covered by the Health Plan, but the Graduate School provides a Health Preparation for Travel fellowship to eligible doctoral students working on the dissertation. The fellowship provides reimbursement for the cost of consultation and inoculations at the Travel Clinic as well as for travel-related prescriptions. The Travel Clinic Certification form is available from the departmental registrar and must be signed by the DGS. Charges for the travel clinic are billed to the student’s bursar account; to be reimbursed, the student must submit the form, along with receipts, to the Financial Aid Office at HGS 129. In addition, Yale students are
automatically enrolled in FrontierMEDEX Travel Assistance and are provided with access to the FrontierMEDEX Online Member Center at no charge, (http://ogc.yale.edu/FrontierMEDEX_Program).

**University Dissertation Fellowship**

The University Dissertation Fellowship (UDF) is awarded to students during the fifth or sixth year of study (and in exceptional cases, during the third or fourth year). The UDF is an academic-year fellowship offered exclusively during the fall and spring terms. It may never be held concurrently with a teaching fellowship of any kind. Students who accept a teaching position in the fall or spring of the final year of eligibility (year 6) will forfeit that term’s fellowship amount. Application materials and additional information can be found at (http://www.yale.edu/graduateschool/financial/forms/UDF_application_form.pdf).

In addition to the UDF, the Graduate School offers a special, competitive dissertation fellowship—the Leylan Fellowship—to advanced graduate students in the social sciences. Dissertation fellowships are awarded only when the adviser and the DGS certify that the student is making satisfactory progress toward the degree and has a reasonable schedule for the timely completion of the dissertation.

Students who hold Yale-administered fellowships are required to be in residence and engaged in full-time study. Permission to hold a fellowship in absentia must be obtained from the appropriate associate dean. A student who leaves New Haven, except for short vacation periods, without obtaining such permission may have the fellowship canceled. No fellowships will be paid for any period when a student is not registered. Registration

Graduate students select and enroll in courses through the Online Course Selection (OCS) web application (http://www.yale.edu/sis). All graduate students are expected to register each term, even when not pursuing coursework. You must submit your course selections on-line, at which point your advisor will review your course selections and either require revisions or approve the course schedule. After your advisor has approved your schedule, the DGS will review the schedule and approve or ask for revisions. The on-line enrollment process is not complete until your registration status is “DGS Approved” and you receive an e-mail message to this effect. The deadline for submitting course selections is usually two weeks after the start of classes (check http://www.yale.edu/bulletin/html/grad/schedule-of-academic-dates-and-deadlines.html for the actual date). A late fee of $25 is charged for course selections submitted after the deadline. The period between the start of classes and the deadline for course selection is commonly called “shopping period” because students may attend a number of courses prospectively and later select the ones they and their advisor deem most appropriate to their course of study. Shopping period etiquette dictates that students attend the first class meetings of all courses they are interested in and that they notify instructors of their decision to take (or not to take) a course by the end of the second week.

If you are not in residence during any term or year after your 2nd year, you must request registration in absentia (see section on Registration in Absentia below).

**Continuous Registration**

Once the full-tuition obligation has been met (after four years or eight terms of study), students are charged the Continuous Registration Fee (CRF) until the dissertation is submitted or the terminal date is passed. Students who are permitted to register after the
sixth year are also charged the CRF. However, the Graduate School will provide a fellowship to cover the costs of the CRF for fifth and sixth year students. The CRF for 2010-11 is $360.00 per term.

Extended Registration

Students must register each term until the dissertation is submitted or until six years (twelve terms) of study have been completed. Students who have not completed the dissertation by the end of year six and wish to remain registered must submit a petition for extended registration (the form can be found at http://www.yale.edu/graduateschool/academics/forms/extendedRegistration.pdf), as well as the dissertation progress report and a continuous registration form. Before a period of extended registration is approved, the adviser and DGS must certify that the student is making good progress on the dissertation, will be working full-time on it during the year, and has a reasonable prospect of completing it by the end of the registration period. The Graduate School will normally approve petitions supported by these certifications for a seventh year, provided that the student is not employed more than twenty hours per week and will be at Yale or in another location conducive to writing the dissertation. International students must be registered to maintain their visa status to remain in the US. Students do not need to be registered to submit the dissertation, but if they are not, they will lose all privileges of registration (e-mail, health care, libraries, gym, etc.). Obtaining extended registration during the eighth year is difficult if not impossible.

Dissertation Completion Status

Obtaining After the 7th (or 8th year) registration student may request DCS in order to have email and library privileges.

Registration in Absentia

In absentia registration applies to all students who do not plan to be in residence during the third, fourth, fifth, or sixth year, or any term within that period. Such registration requires approval form the DGS and Associate Dean. Forms are available at (http://www.yale.edu/graduateschool/academics/forms/inAbsentia.pdf).

Academic and Other Holds

Academic holds occur when students are not making satisfactory academic progress, or when certain forms (i.e., dissertation progress reports) are not submitted on time. Students will also be placed on financial hold if they owe money to the university (fines, fees, bursar bills, etc.), or on health hold if they have not supplied evidence of immunity to measles and rubella. To check if there are any holds on your registration status, you can go to Student Systems (http://www.yale.edu/sis), log onto your account and click on “your holds.” If you are on hold, you should contact the Associate Dean’s office to see what must be done to rectify the situation. Being “on hold” blocks your ability to register, and failure to register can ultimately lead to withdrawal from the university.

Leave of Absence

A leave of absence requires the approval of the Associate Dean. There are two types of leave: personal and medical. A Yale health plan physician must recommend a medical
leave and then recommend a return to normal study. Students retain university medical coverage for the semester they are placed on leave. Personal leave is given for reasons such as pregnancy, maternity or paternity care, or financial emergencies. To be eligible for personal leave, a student must have satisfactorily completed at least one term of study. Normally, students are not eligible for a leave of absence after the fourth year of study, although exceptions occur.

To apply for a leave of absence, you should confer with the DGS and then write directly to the Associate Dean before the beginning of the term for which the leave is requested. The letter should explain the reasons for seeking the leave, the date through which you wish to remain on leave, and provide a contact address. The Dean will discuss the application with the DGS and inform you in writing of the action taken on your request. For more information on this subject see [http://www.yale.edu/bulletin/html/grad/policies-and-regulations.html#d1e30028](http://www.yale.edu/bulletin/html/grad/policies-and-regulations.html#d1e30028).

**Parental Support and Relief Policy**

New parenthood at the birth or adoption of a child substantially affects the ability of doctoral students to meet academic and professional obligations. The constraints introduced by becoming a parent while enrolled in a Ph.D. program also have long-term career effects. Recognizing this fact, the policies described below support the intersecting personal and professional lives of graduate students at Yale. For more information, please see: [http://www.yale.edu/bulletin/html/grad/policies-and-regulations.html#d1e30096](http://www.yale.edu/bulletin/html/grad/policies-and-regulations.html#d1e30096)

Registered Ph.D. students who wish to modify their academic responsibilities because of the birth or adoption of a child may request parental support and relief during or following the term in which the birth or adoption occurs. For the whole of the term in which the support and relief are requested, the student’s academic clock stops, effectively adding an additional term to the total time to degree. During this period, students remain registered, receive the full financial aid package as specified in their letter of admission, and will have departmental academic expectations modified to best suit the specific situation. The precise nature of the academic responsibilities undertaken or suspended during this period should be a matter of consultation among the adviser, the student, and the Graduate School, with the understanding that students are entitled to full relief for at least an eight-week period. Students who take only eight weeks of relief during the semester in which, or just after, a birth or adoption occurs may receive an additional eight weeks of stipend funded by the Graduate School in a later semester; Parental Relief may not be combined with other funding. To arrange for parental relief, contact the appropriate associate dean four months prior to the birth or adoption.

Graduate students in terminal M.A./M.S./Ph.D. programs may modify their academic responsibilities because of the birth or adoption of a child. They should contact their associate dean the term before the planned modifications would occur.
Procedure on Submitting Forms

During your program of study as a PhD student, there will be many forms that you will need to submit, whether they be academic forms or applications for funds. For those that need your advisor’s signature, please obtain the advisor’s signature and then submit the form(s) to the Departmental Registrar, who will then obtain the DGS signature and forward the form(s) to the appropriate Graduate School Office.

Departmental Resources

Students and faculty have access to office equipment. For any assistance with this equipment, please see the Registrar’s Assistant.

Copier: The copier requires the user to enter an ID code which is the last four digits of one’s social security number. Copies made using individual ID numbers will be charged to the user’s university account. Please make double-side copies whenever possible. That ID will be the course number plus the last four digits of the TA’s social security number. The copier, which is networked with a computer in the computer cluster, also has capability to scan articles, etc., to be downloaded in an e-file.

Teaching assistants can obtain a code to charge course-related photocopies to the course’s account for hand-outs such as syllabi and exams, but should not be used for course packets. Course packets should be available to students at their own cost at the various local copy shops.

Computer Cluster: Four computers are available to all students and faculty who have their Yale net ID at 10 Sachem Street, Rooms 211 and 309.

Scanner: A scanner is also available in 10 Sachem, Room 309, but for multi-page documents uses the copier for scanning as noted above.

Printer: Printing is free of charge using one of these two computers.

Fax Machine (203-432-3669): Public faxes can be sent and received at no charge. Always dial 9 before dialing appropriate number.

Typewriter: A typewriter is also available for use at 10 Sachem Street, Room 309.

Student Lockers: Student lockers are available this academic year funded by the Schwartz Family Foundation. Please see Marleen Cullen to obtain a locker assignment. You will need $5.00 for a key deposit.

Students generally have access to the department after hours. Incoming students can obtain Yale ID swipe access and information on access to the archaeology laboratories from the Registrar’s Assistant.

Computers and Information Technology

Students can find information on Yale IT basics at http://www.yale.edu/its/stc/. This site has instructions or links to help on topics such as:
• Locations of public computer clusters
• Printing at clusters
• Wireless and wired Yale network access
• Using Yale’s Student Information System (SIS) website
• Accessing Yale Online Course Information
• Accessing Pantheon space to store your own documents or set up web pages
• Downloading free software from Yale
• Using Yale e-mail and local e-mail clients
• Computer security and virus protection

Students can obtain often substantial discounts on computer equipment, software, lab supplies, postage, etc. through [www.yale.edu/eportal](http://www.yale.edu/eportal) or presenting your Yale ID requesting educational discounts. Many of the links will direct the user to the company’s website and require an initial registration before use.

A number of applications and software packages for Windows, Mac, and Unix are available at little or no charge to members of the Yale community at [http://www.yale.edu/its/software/](http://www.yale.edu/its/software/). Users must be connected to the Yale network to access the site.

Advanced computer equipment such as video editing machines, scanners and audio devices are available for use by students with permission.

Extensive online help and support for Yale students is available at the ITS web site which contains information on topics such as:

• Spyware removal
• Connecting to Yale-restricted resources from off-campus
• Software access and licensing
• Using technology in the classroom
• FAQs
• Registering new computers for campus-wide wireless access.

Additionally, an excellent computing manual in PDF form is available at [http://classes.yale.edu/help](http://classes.yale.edu/help).

Teaching Fellows can obtain help with instructional technology tools such as PowerPoint, web design and digital media by visiting [http://classes.yale.edu/help](http://classes.yale.edu/help).

Yale-restricted resources, such as online periodicals and the email server, can be accessed from off-campus using Yale VPN (Virtual Private Network) or the Yale Proxy Server. Information on installing Yale VPN can be found at [http://www.yale.edu/its/network/vpn.htm](http://www.yale.edu/its/network/vpn.htm). Information on using the Proxy Server and/or Yale VPN to access electronic resources can be found at [http://www.library.yale.edu/pubstation/proxy/proxy_about.html](http://www.library.yale.edu/pubstation/proxy/proxy_about.html). Installation of Yale VPN is recommended when possible. [http://www.yale.edu/its/software/]

Students have access to personal file storage and Web publishing services provided by Information Technology Services (ITS) via MYFILES. Users can store copies of important documents such as course work, notes, and graphics, and access these files anywhere using a simple Web interface. MYFILES also helps you share files with other users and enables you to publish a personal web site. Information on this service can be found by clicking on the myfiles.yale.edu link at [http://classes.yale.edu/help](http://classes.yale.edu/help). To publish dynamic web content, students can request a web account at [http://bin.yale.edu](http://bin.yale.edu).
Graduate Student Teaching Fellows can learn about publishing course web pages on the Yale Classes Server by visiting [http://www.yale.edu/instruct/web/webpage.htm](http://www.yale.edu/instruct/web/webpage.htm).

Students can use Luna Imaging Inc.’s Insight® software to access, use, and present digital collections using the Internet. Collections available to users on the Yale campus include: The Visual Resources Collection (25,000+ images), The Beinecke Rare Book & Manuscript Library Insight Collection (11,000 + images), The David Rumsey Map Collection, the AMICO Collection and others. Information on how to utilize this software can be found at [http://www.library.yale.edu/lso/workstation/insightfaq.html](http://www.library.yale.edu/lso/workstation/insightfaq.html).

Students have access to help from Computing Assistants (CAs), students hired by [Student Computing](http://www.yale.edu/cas/) to serve as general consultants for computer or network problems. CAs support Yale undergraduates and graduate students in the Arts & Sciences. Information on how to obtain help from Computing Assistants can be found at [http://www.yale.edu/cas/](http://www.yale.edu/cas/).

**Libraries**

Anthropologists routinely use a number of libraries on campus including the centrally located Sterling Memorial Library (SML) and Bass Library which occupy a single complex on Cross Campus (http://www.library.yale.edu/). Located closer to the department is The Center for Science and Social Science Information in the concourse level of the Kline Biology Tower (http://csssi.yale.edu/).

The libraries offer workshops, tutorials and tours throughout the year. [http://www.library.yale.edu/researcheducation/](http://www.library.yale.edu/researcheducation/)

Bibliographic management software is provided at no additional cost to students (Endnote and RefWorks.) [http://www.library.yale.edu/cite/](http://www.library.yale.edu/cite/) Contact me if you are interested in others.

There are online library subject guides to help you discover resources needed for your research. [http://guides.library.yale.edu/anthropology](http://guides.library.yale.edu/anthropology) and [http://guides.library.yale.edu/](http://guides.library.yale.edu/)

**Your Personal Librarian: Gwyneth Crowley**

Librarian for Anthropology, Economics, Sociology, Psychology and WGSS Center for Science and Social Science Information, Yale University 203-432-3213, Gwyneth.crowley@yale.edu

**Center for Science and Social Science Information**

The Center for Science and Social Science Information (CSSSI), a collaboration between the Yale University Library and Yale Information Technology Services (ITS), is located at 219 Prospect Street on the concourse level of the Kline Biology Tower. The Center incorporates the services of the Science and Social Science Libraries and the ITS StatLab and provides state-of-the-art information services in a technology-rich, newly renovated environment.
Study Room South
- Open 24 hours, 7 days a week
- Soft seating, group tables and chairs and computer workstations
- Data and power jacks are available throughout the space
- Lockers have two power jacks in each cubicle to charge personal items
- Lockers can be reserved at the Information Desk for 3 hours (renewable)
- Three group study rooms are available with Media:scape technology
  Media:scape is a configuration of technology and furniture that allows small groups to access and share online screens and data in a collaborative way
- Writeable glass walls and whiteboards are available throughout the Center for creative thinking and collaboration
- Media wall: for digital exhibitions, presentations, departmental showcases, game nights and more

Study Room West
- Information Desk provides expert research and technology assistance during hours of operation
- Individual and group study tables, features a variety of computer equipment and software; 26 PCs and 14 Macs
- Software and hardware includes:
  1. Scanners including Book Scanners, Flatbed Scanners, and Microform readers
  2. Digital tablets for tracing maps, drawing, and annotating documents
  3. PCs with dual monitors, extra memory AND speed
  4. **GIS Software (Google Earth, ArcGIS)**
  5. Statistical Software including (Stata, SAS, SPSS, Mathematica, R)
  6. Special Graphics software like (Maya, SolidWorks, LaTex, ArtStor)
  8. Visualization Software, like Processing
  9. **Macs have: Adobe CS5 (Photoshop, Illustrator, InDesign, Dreamweaver, Flash, Fireworks, Acrobat Pro)**
- Media Macs also have Movie Editing Software on them
- Traditional study tables, soft seating for individual or group study, outdoor study area

Study Room East
- **StatLab classroom:**
  1. available for computer based instruction featuring multiple projection screens, digital annotation/touchscreen monitors
  2. ubiquitous writing space
  3. Science/Social Science software
  4. full suite of multimedia presentation tools (DVD, VCR, auxiliary inputs)
- StatLab consultants are available during the day and evening for consulting on data analysis, quantitative research and survey design
- Two presentation practice rooms provide the capability to record and rehearse presentations - these rooms also have video conferencing capability
• Moveable small tables for individual or group study
• Offices of Subject Librarians and Statistical Analyst

Stacks – Lower Level
• Collection of approximately 180,000 science and social science volumes
• 8 study carrels, 3 study tables, and rolling white boards
• Government documents reference

Addressing Disputes and Grievances

In the case of grievances or conflicts between a student and faculty, administrators, or other students, there are channels at the level of the department, Graduate School, and university for addressing these concerns. Most problems can be solved informally within the department. If a student has a complaint against a professor that cannot be solved by dealing directly with the professor in question, in most cases the student can address the problem by consulting with the DGS and/or Chair. If a problem cannot be solved within the department, or the student feels the problem cannot be addressed fairly in the department, the student should submit a letter to the appropriate Graduate School Dean describing the problem. Most problems can be addressed through informal arrangements either at the Department or Graduate School level.

However, in some cases, including but not limited to complaints of harassment or discrimination on the basis of race, sex, color, religion, national or ethnic origin or handicap, students may file a formal grievance at the level of the Graduate School, the Provost, or the President of the University. These grievance procedures apply to problems with faculty, administrators, other graduate students, or other university employees. A description of these procedures is available at http://www.yale.edu/graduateschool/academics/forms/grievanceProcedures.pdf. These formal procedures do not normally apply to academic disputes such as grades, qualifying exam evaluations, or course content, which are protected under the academic freedom of professors. The only exception is in allegations of discrimination based on race, sex, color, religion, national or ethnic origin or handicap.

International Students

Yale offers numerous resources to its many international students and scholars. Due to some special requirements for international students, they are highly recommended to consult the links listed below. Some important information, such as visa and SPEAK test information, are available through these links. In addition, international students are also encouraged to participate in the International Student Orientation at the beginning of the year, where much of this information will be also available. Please note that it is very important for international students to check-in at the Office of International Students and Scholars (OISS) when you first arrive on campus. Also, remember that all international students who did not graduate from an English-speaking university must provide acceptable scores on the Test of Spoken English (TSE) or pass the SPEAK test in order to be assigned teaching fellowship assignments higher than a Grader-Only, which is an obligatory part of the Ph.D. program. The SPEAK test is administered by the English Language Institute at Yale. Please check the Handbook for International Student and
Scholars for information and additional links:
http://www.oiss.yale.edu/students/handbook.pdf.

For information on obtaining a Visa or renewing a Visa, visit the Office of International Students and Scholars (http://www.yale.edu/OISS).

Memo Department of Anthropology 3/6/2007
TO | Incoming Ph.D. students in Sociocultural Anthropology
FROM | Bill Kelly, Chair
RE | Changes to the doctoral program in sociocultural anthropology to be introduced in 2007-2008

In welcoming you to the Department, I want to describe several changes in the doctoral training program for sociocultural anthropology that we will introduce in 2007 and that we believe will significantly enhance the quality of your training.

These revisions are part of much broader strategic planning in which the Department has been engaged since last spring, and it will coincide with the opening of our new Department building at 10 Sachem Street. The overall Plan articulates Department and subfield priorities and proposes a modest expansion in faculty size, and we are currently discussing with the Provost of the University to bring this about. You should know that this plan has been generated by extended discussions and participation by all members of the Department community—faculty, staff, graduate students, and undergraduate majors. We have listened closely to all suggestions and perspectives in creating a Plan that all of us are excited about. Thus, that portion of the Plan that I describe below—the changes to the doctoral program in sociocultural anthropology—is the result of a very collaborative and consensual process.

There are several components to the revision of the sociocultural doctoral program that we agreed to in the fall and which I introduce below in the context of a more comprehensive description of the program as you will experience it. Please do not hesitate to contact me or any other faculty (especially William Kelly, our Director of Graduate Studies) about any questions you may have.

A. Your first year: Core seminars and individual training

The first-year program in sociocultural anthropology will now be centered on a new sequence of four required seminars, organized into two sequences.

Fall-term Seminar 500a: The Development of the Discipline: Historical Trajectories
Spring-term Seminar 500b: The Development of the Discipline: Contemporary Themes
Fall-term Seminar 501a: Anthropology and Classical Social Theory
Spring-term Seminar 501b: Anthropology and Contemporary Social Theory

These four seminars will constitute half of your expected course load for the first year. You will continue to have considerable freedom in selecting the remaining four courses in consultation with your advisory committee.

We already do offer versions of each of these four seminars, and in fact most of our doctoral students take these or similar seminars sometime in their first three years. For an example of the curriculum, please see http://classes.yale.edu/anth500a. However, we believe there is enormous benefit to be gained by coordinating this quartet and by targeting them specifically for the first-year cohort. It creates cross-seminar and full-year synergies for the cohort and it builds intellectual coherence and social community.

Each seminar will be taught independently by separate instructors, but we will coordinate the curriculums of the four seminars through discussions among the four instructors for any given year.

The consensus was that all first-year sociocultural students would be required to take all four seminars, and we will also require the sequence of all joint degree candidates (including joint degree programs with FES, American Studies, and Afro-American
B. Your second year: Learning professional research and advancing to candidacy

1. Courses

Our second-year doctoral students are generally returning from a funded summer of predissertation research and/or language training, and the second year has always been the most appropriate moment to begin serious training in research methods.

Beginning in 2008, we have offered a year-long required Seminar on Research in Sociocultural Anthropology (numbered Anthro 502 and 503) that provides a comprehensive introduction to (1) research design, (2) research methods, (3) ethics, (4) grant proposal writing, (5) ethnographic writing, and (6) research presentation.

The 502 and 503 sequence combines theoretical and professional training with structural features of a seminar, a practicum, and a workshop. Where appropriate, instructors call on other faculty, grant foundation program officers, and dissertation writing graduate students to give presentations on particular topics.

These two seminars are the only departmental requirements in the second year for sociocultural and linguistic anthropology students. Your other coursework will continue to be determined by your individual needs and interests. As with first-year seminars, the two semesters will be taught by different instructors, but advance discussion will ensure coordination and comprehensiveness.

2. The Ph D candidacy qualifying exam.

For many years, the department has conducted qualifying examinations near the end of the second year. These consist of a two-day written examination, given at the end of March, followed about 10 days later by an oral examination. Each student forms and works with an examination committee, typically of four faculty members, and identifies topics and areas of concentration on which s/he is examined. About one week later, the committee conducts a two-hour oral examination, largely based on the questions and responses to the written examination.

The system allows us to tailor exams to the needs of individual students, but many faculty and students came to believe that its drawbacks may be worse than the advantages of customizing. In particular, the present format requires a lot of time by the student to determine the scope of the exam at the cost of time available to actually preparing for the exams themselves. Many also felt that the format complicated issues of equity and assessment.

There is still broad consensus that the qualifying exam should be taken at this time in the second year, but in line with the changes we are making to our core curriculum, we are also changing the exam scope and format. This change has two parts, a restructuring of the exam itself and the addition of a third-year “field paper.” That is, beginning with the 2007 entering class, the qualifying examination will be a written examination of four (possibly five) hours, taken on a single day. It will be based entirely on the core sequence of seminars in each subfield (i.e., ANTH 500a/b, ANTH 501a/b and ANTH 502/503). Thus, all students will receive the same exam, and this exam will be written collectively by the professors who had taught that cohort’s core sequence.

We believe this new format will offer several advantages. It will focus of the scope of the exams on foundational material, it will offer a more transparent process for preparation and evaluation, and it will provide a framework for collective study among the doctoral student cohort.

d. Your third year: Dissertation preparation and teacher training

Most of our students also spend the summer between the second and third year in the field, doing preliminary research for their dissertations. The third year in the program thus emphasizes research and design, the preparation of proposals for outside funding, and training and practice in classroom teaching. The one major change for third-year Sociocultural students will be a new requirement to prepare and defend a “field paper.”
i. Dissertation proposal preparation. Outside research grant proposals are generally due in mid- to late fall, so third year students are immediately busy in preparing proposals. The department will continue its current requirement that a full version of this proposal be successfully defended orally before the student’s advisory committee, whose endorsement will be brought to before the full faculty for approval. There is strong sentiment that we should also arrange for public presentations of the proposals to a wider forum, and we are exploring possible formats.

ii. Teaching Fellow experience. Generally each third year student in residence is offered one TF assignment in each semester. We are also exploring with the McDougal Center staff the feasibility of a “certificate in teaching anthropology” that might be based on teaching fellow experience within and beyond one subfield and participation in certain kinds and numbers of teaching workshops.

iii. “Field paper” preparation. As noted above, qualifying for Ph.D. candidacy will now require you to prepare a “field paper,” which you will typically fulfill in your third year. Because we are narrowing the scope of the second-year qualifying examination, this “state of the field paper” in effect becomes the means by which students can develop and demonstrate their relevant topical and areal expertise (which they had previously done through the current second-year qualifying examination).

In designing this requirement, there was broad agreement that the research paper format can much better serve student needs for this than the examination format. It can be a highly effective bridge between the course work of the first two years and the dissertation project that will begin in the fourth year. One of our influences for this change was our very successful joint Ph.D. program with Forestry and Environmental Sciences, which has had such a requirement for several years and has been very well received by students.

We envision the field paper to be a broad treatment of the areas of scholarship within which the student will locate his or her dissertation project. It should critically review the theoretical, substantive and methodological approaches within these areas, and identify and assess the directions of research. It is not intended to be simply a bibliographic review or a long proposal, but rather an analytical appraisal of a field of study that can serve as the foundation of the dissertation project.

The field paper will be developed with the guidance of the student’s advisory committee, and a final written version will normally be deposited with the DGS by March 15. All students must orally defend their field papers before their committees. The successful defense of the field paper will be required for admission to candidacy.

Because most students will be submitting their grant proposals in the fall of their third year, the field paper is likely to be a significant expansion that takes on qualities of a scholarly paper rather than just an overly long prospectus. Again, the FES program provides very good evidence that this can be a very productive way of helping to organize students’ third year.

A note on individual training in first through third years: In sum, you will be expected to take six required core seminars. There is still a consensus that doctoral students in the department should take a total of 16 courses toward admission to candidacy, and these new requirements will still leave considerable room to develop topical and theoretical specialties, including course work outside the Department. Given the new focus of the qualifying examination, it is also possible that students could delay one or two of their courses until the third year. Note, too, that several of you are considering joint degree programs, and this will bring some adjustment in your schedule over the years. These are matters that are worked out with your advisory committee and the DGS’s of the relevant departments.

e. Your years 4 and beyond: Dissertation research and writing and final professional mentoring

Given the research priorities and commitments of the Department, almost all of our doctoral students engage in extended non-resident field research for their dissertations (c. 6-18 months). They are generally quite successful in obtaining outside funding for this research, which they frequently begin in their fourth year, a year that the Graduate School normally designates as a “teaching year.” Because Anthropology doesn’t fit the generic schedule of the Graduate School, we try to insure our doctoral students in their
fourth, fifth and sixth years are treated flexibly so that they can productively coordinate their field research, dissertation writing, and teacher training. One way in which we have done this within the department is to advise one-semester TF appointments for our students returning from field research before they begin their Dissertation Writing Fellowship. This compensates for the opportunities that they forego in the 4th year, and it also usefully bridges the very sharp disjuncture that most of our students experience between field research and the writing process back here at Yale.

Dissertation writing. Because of the small number of students writing dissertations at any one time and because of the distinctive features of our subfield dissertations, we have never placed dissertation writing within a Department-wide seminar. Our experience has been that ad hoc, student-run writing groups have been more effective in providing support and feedback that supplements the essential working relationship between the student and his or her dissertation supervisor. The Department already offers modest subsidies to such writing groups for photocopying, refreshments, and other expenses.

Regular calendar of modules of professional skills workshops. What we will do in subsequent years is to devote greater attention to developing professional skills. The Graduate School’s McDougal Center does offer a useful program of such workshops for all graduate students, and we strongly encourage doctoral student participation. At the same time, it is desirable to augment these general workshops with short sessions within the department for advice tailored specifically to our own subfields. Thus, with student input, we will be creating and offering a regular schedule of short sessions to deal with the following specific concerns:

• Looking for jobs (teaching, postdoctoral fellowships, non-academic positions)
• Writing job letters
• Being interviewed
• Preparing job talks
• Early publishing strategies

It should be noted that through the generosity of an individual donor, Marion Schwartz, the Department has a fund that subsidizes the attendance of all of our doctoral students at professional meetings. This has been an enormous benefit, and for those students finishing their dissertations it provides a means for professional presentations and job interviews.

Appendix B

GUIDELINES FOR COMBINED F&ES/ANTHROPOLOGY Ph.D. PROGRAM
{amended, most recently, on September 1, 2011}

History and Purpose

The combined Forestry and Environmental Science (F&ES)/Anthropology Ph.D. Program was first created by former Yale Provost Alison Richard to meet the needs of doctoral students in biological anthropology who wanted to draw more fully on the resources of both the Anthropology Department and F&ES. Recent interest in the combined degree has mainly come from students working in the allied fields of ecological anthropology, social ecology, and political ecology. We envisage this program, however, as open to all sub-disciplines in Anthropology, and students across forestry and environmental sciences fields who wish to combine their studies with Anthropology. The purpose and attraction of the degree is three-fold: (1) it combines the disciplinary identity and strengths of the Anthropology Department with the inter-disciplinary character and possibilities of F&ES, especially in terms of bridging the social and natural sciences; (2) it combines the strengths in ecological and environmental studies of F&ES with the social science strengths of the Anthropology Department; and (3) it combines the Anthropology Department’s strengths in theory with the emphasis within F&ES on linking theory with policy and practice. The combined doctoral degree offers its graduates great flexibility when entering the marketplace: they can represent themselves as anthropologists and/or environmental scientists, as theoreticians and/or practitioners. They have the credentials to apply for policy-oriented positions with international institutions as well as academic positions in teaching and research. The academic program of each student in the combined degree program is to some extent tailored specifically to his or her particular history, interests, and needs, but there are general guidelines that combined students can be expected to follow, and they are laid out here.

Eligibility and Master’s Degrees

In general, eligibility for entry into the combined degree program will be the same as that for either the F&ES or the Anthropology doctoral program (which is detailed in their respective bulletins). Prior award of a Master’s degree is generally preferred for entry into the F&ES doctoral program but not the Anthropology doctoral program. Therefore, the desirability of a prior master’s degree will be weighed on a case-by-case basis among applicants. Combined degree students will receive (upon petition) an M. Phil. degree from the Graduate School of Arts and Sciences (GSAS) after passing their comprehensive exams.

Application

Prospective combined degree students must initially apply either to Anthropology or to F&ES but not to both at the same time. They should, however, as per the current Yale Graduate School application process, indicate their interest in the combined degree by marking the application form appropriately. Once accepted
in the initially chosen doctoral program, the student’s file will be considered in the second program and a recommendation made on the combined degree application that will be communicated by the Graduate School. Admitted students will be allocated to the initially chosen program as their primary administrative home but will enter Yale as members of the combined degree program. Being turned down for entry into the combined degree program at this point does not preclude re-application after arriving at Yale the following Fall semester.

It is possible for a student who has entered Yale through either Anthropology or F&ES as a Ph.D. student to then petition to enter the combined degree program. A student interested in the combined degree may apply to the second program, after first securing the support of his/her prospective principal advisor and the Director of Graduate Studies (DGS) for either F&ES or Anthropology, as appropriate. In order to meet the demands of the combined degree in a timely manner, it is best if this second application is made as soon as possible in the student’s doctoral program and ideally no later than the last week in October during the first semester of graduate study at Yale. To help make this possible, such applications to the combined program will be reviewed on an ad hoc basis as they are submitted, without being held to the normal annual calendar for doctoral applications. However, applications to the combined program should in content and all other respects follow the norms of the regular doctoral application (the sole difference being that the applicant should specifically address in the statement-of-purpose why he/she is interested in the combined program). This application will be reviewed by the F&ES doctoral committee or the Anthropology faculty (in the latter case, the Departmental Graduate Registrar must receive the application at least one week before a regularly scheduled faculty meeting). If the applicant is admitted, the applicant will then submit the proposal (counter-signed by both DGSs) to, and meet with, the Associate Dean of the Graduate School (currently Richard Sleight), who will make the final decision regarding admission. A positive decision by the Dean will constitute formal admission into the combined degree program.

Requirements of the Combined Degree

The requirements of the combined doctoral degree are the same as those of the doctoral degrees of F&ES and Anthropology (which are detailed in the bulletins of the respective institutions), with the following exceptions or clarifications. First, the combined students are required, upon acceptance into the combined degree program, to draw up a program of coursework. The combined degree program requires doctoral students to take 16 units/courses, which will be apportioned between Anthropology and F&ES, and other university departments, based on consultations with the student’s committee. During their first three semesters in the program, combined degree students must take a) the one-semester doctoral seminar at F&ES (taken in year one), and b) required coursework in Anthropology as outlined by each subfield for combined degree students. Please see Appendix A for coursework requirements for combined degree students specializing in sociocultural anthropology.

The teaching fellow requirements of the combined program vary depending upon whether the combined student first entered into Anthropology or F&ES.
Combined students receiving their stipends from Anthropology are expected to serve as Teaching Fellows (TFs) during their 3rd and 4th years of study. Some teaching may be deferred for student needing to perform fieldwork in their 3rd and/or 4th years. Those receiving their stipends from F&ES are expected to serve as TFs for 2 semesters and research project/assistant (R.F.) for 2 semesters for a 4-year F&ES stipend, and to serve as TFs for an additional 2 semesters (one of which must be at a level of 20 hours/week as opposed to the normal 10 hours/week) if they wish to receive a 5th year of stipend support for writing-up. Winning of outside stipend and tuition support reduces these requirements commensurately.

Doctoral Committee
Combined students will be assigned an advisor in both F&ES and Anthropology upon admission to the combined program. As soon as possible thereafter, but in no case later than the end of the 2nd semester, each student must constitute a formal doctoral committee. The student’s principal advisors in F&ES and Anthropology will serve as co-chairs of the committee. The committee also must have one additional member drawn from each department. Further committee members, beyond the four specified here, may be drawn from the rest of the university, or from beyond the university according to the student’s needs. If the student invites to his/her committee a member of the faculty jointly appointed between Anthropology and F&ES, the student in consultation with co-Chairs can determine which department that faculty member would count for, so as to select a fourth committee member from the other department to maintain the committee composition specified.

Exams, Prospectus, Dissertation
The combined degree students will take their comprehensive exams during their 4th semester. This will be a written examination comprised of two parts. The first part of the examination will be taken over four or five hours on a single day. It will be based entirely on the core sequence of seminars taken in F&ES and Anthropology. The second part of the examination will also be taken over four or five hours on the next day or within a week of the first part. It will be based on elective courses and bibliographies of anthropological and inter-disciplinary environmental studies research pertaining to the world area (for example sub-Saharan Africa, or Southeast Asia, or Latin America) that the student has chosen for conduct of dissertation field research. Both parts of the written examination will be taken starting in the last week of March and the examination will be written by the student’s committee which will include, only for the duration of the examinations, a representative of the Anthropology Department’s examination committee (which draws upon faculty teaching the core curriculum in that year). Both parts of the written examination will consist of 6-8 questions, of which 3-4 questions will have to be answered. These exams, if permitted by the student’s committee, may also be answered as a take home and submitted a week later. The entire committee will sit in an oral examination of the entire written exams within two weeks of the completion of all written examinations. Remote participation by telephone conference call is permitted where necessary (i.e. for outside committee members who cannot attend in person). The exam will consist of a brief presentation/overview by the student, followed by questioning by the committee. There are only two possible exam
outcomes: Pass, or Fail. If a student fails, he/she is dismissed from the Graduate School.

All combined students must prepare a comprehensive dissertation prospectus, called the field paper in Anthropology, in close consultation with their committee, and following Anthropology and F&ES guidelines. This document, which also serves as the basis for proposals for outside funding of field research, normally runs 50-100 pages in length. The student must defend this prospectus in a formal oral defense before the entire committee (and other interested faculty members). The oral defense is held within the department that serves as the student’s administrative home. There are several possible outcomes to the defense: unconditional Pass, Pass conditional upon specified revisions to the prospectus, or Fail. If the student fails the examination, the committee and DGSs will together prescribe the remedy, which may include scheduling a second defense. If the student fails a second time they will be dismissed from the Graduate School. A successful defense of this prospectus/field paper satisfies the oral defense required by F&ES and the Department of Anthropology, and is required for admission to candidacy. A final version of this prospectus must be filed with the DGS by March 15th, and the student’s advisory committee’s endorsement of this document must be brought before the entire Anthropology faculty in its next meeting in April. Depending on their progress and readiness, combined degree students may complete these prospectus/field paper requirements in their fourth, fifth, or sixth semester of study. If it seems advisable this requirement may be fulfilled in the fifth semester and in that case the final prospectus would need to be filed with the DGS by October 15th.

The completed dissertation must be defended, following F&ES guidelines, before a meeting of the entire committee (and other interested faculty members). The defense will consist of a presentation/overview by the student, followed by questioning by the committee. There are three possible outcomes to the defense: unconditional Pass, Pass conditional upon specified revisions to the dissertation, or Fail. In the event of failure, the committee and DGSs will together prescribe the remedy, which may include scheduling a second defense. If the student fails a second time they will be dismissed from the Graduate School. Following a successful defense, three formal reader’s reports must then be prepared for presentation to the DGSs of Anthropology and F&ES. At least two of these must come from tenured Yale faculty, and at least one must come from the F&ES faculty and at least one from the Anthropology faculty. The readers must be recommended by the appropriate DGS and approved by the GSAS.

Scheduling

Combined students will preferably schedule their comprehensive exams and prospectus defenses during the fourth and fifth semesters (and no later than the sixth), respectively. Most students find it preferable to schedule the prospectus defense after the comprehensive exam. Combined students should also write funding proposals during the 4th or 5th semesters (and intervening summer) so that they can depart for fieldwork after completing their exams and defenses. Combined students typically employ the summers after the 2nd and 4th semesters for pre-dissertation fieldwork and/or language study (and/or, in the case of the second
summer, proposal writing). The principal period of fieldwork averages perhaps 18 months, but varies from 12 to 30.

**Funding**

The Ph.D. program to which the combined student first applied is entirely responsible for his or her stipend and tuition. Funding for summer fieldwork, language study, and attendance at professional meetings, and funding for the principal period of fieldwork, are available from a variety of sources. Combined students are eligible for in-house grants from both Anthropology and F&ES. In the case of F&ES, these include research grants from the Tropical Resource Institute, conference travel grants from the Doctoral Program, and F&ES/YIBS research grants. In the case of Anthropology, these include the Williams and Albers Funds for research and the Schwartz Fund for conference travel. Combined students are also eligible for a wide range of intra-Yale grants for research and language study, including the Enders grant, and awards from the Agrarian Studies Program, the MacMillan Center, the various area studies councils, and a number of other area-specific grants. Five years of twelve-month support is available from the Graduate School to those students who first applied to Anthropology, and fixed summer support grant is available from F&ES (for a maximum of two years) to those students who first applied to F&ES and have not secured external support.

Combined students typically fund their summer pre-dissertation research and language study from these Yale sources but fund most of their major period of fieldwork from sources outside Yale. Combined students have been very successful winning awards for this purpose from Fulbright, Fulbright-Hays, and NSF, among other sources. Students who first applied to F&ES (but not Anthropology) and who win outside awards for their major period of fieldwork may (if they wish) go off stipend for the duration of the outside award and partly “bank” that stipend support for use as needed during the write-up period (see the F&ES Doctoral Student handbook for further details). Combined students who first applied to Anthropology are eligible for a dissertation writing fellowship from the Graduate School to support them while writing up during the 5th year or 6th year. Students who first applied to F&ES are not eligible for this support from the Graduate School but are eligible for a 5th year of support from F&ES on the condition of serving as T.F. (at some point during the 5 years) an additional 2 semesters. Any additional work as a T.F. or R.F., done while the student is still on stipend and in order to supplement that stipend, is subject to Graduate School regulations. Winning of outside awards that apply to stipend/living expenses also is subject to Graduate School regulations.

**Combined Degree**
The student who successfully completes the combined F&ES/Anthropology program receives a combined doctoral degree in Anthropology and F&ES, not two separate degrees.

**Further Information**
Interested parties may contact the Program Coordinators, or the respective DGSs, as follows:
Michael R. Dove and K. Sivaramakrishnan
Coordinators, Combined F&ES/Anthropology Ph.D. Program

Karen Seto
Director of Graduate Studies, School of Forestry & Environmental Studies

Anne Underhill
Director of Graduate Studies, Department of Anthropology
GENERAL SCHEDULE FOR COMBINED ANTHROPOLOGY/F&ES STUDENTS*

APPLICATION:
EITHER AT THE TIME OF APPLICATION TO GRADUATE SCHOOL:
To F&ES OR Anthropology as primary home with Combined Degree option: Year 0

OR AFTER ADMISSION TO EITHER THE F&ES OR THE ANTHROPOLOGY Ph.D. Program:
To other program (to which one did not initially apply), then
To Associate Dean of the Graduate School: Semester 1 of Year 1

COMMITTEE:
Form committee with co-chairs from Anthropology and F&ES: end of Year 1

EXAMS:
Comprehensive exam 4th semester
Prospectus writing, defense, and final submission 4th, 5th, or 6th semester

OTHER PREPARATION:
Pre-dissertation fieldwork/language study: summers after 1st & 2nd years
Proposal writing for field funding: 4th or 5th semesters & summers

TEACHING/SERVICE
Anthropology: TF (unless in the field) Years 3-4
F&ES: 2 semesters as TF and 2 semesters as RF Years 1-4
F&ES: 2 semesters as TF (for optional 5th year funding) Year 5

DISSERTATION DEFENSE
Oral defense: Years 5 or 6

* This schedule lays out the schedule for the combined program in general terms. For more detail, see the 4-page “Guidelines for Combined F&ES/Anthropology Doctoral Degree Program” and the F&ES manual “Procedures and Practices Relating to Doctoral Student Work.”
Appendix C

GUIDELINES FOR COMBINED F&ES/ANTHROPOLOGY Ph.D. PROGRAM: Course Requirements for Students Specializing in Sociocultural Anthropology

Combined degree students specializing in sociocultural anthropology are required to take the following courses in their first three semesters in the program.

- The one-semester doctoral seminar at F&ES (taken in year one)
- F&ES 520 (Society & Environment: Introduction to Theory and Method), F&ES 535 (Social Science of Development & Conservation), and F&ES 838/Anth 517 (Producing & Consuming Nature)
- At least four courses from the six core courses including the four first-year theory courses and two second-year research design and methods courses (as specified in the Handbook for Graduate Students) in Anthropology. This selection should include at least three courses from the first-year course sequences and should be made in consultation with the program coordinators and the DGSs for F&ES and Anthropology.

Students would be free to take more of these core Anthropology courses as electives if they so wished, or might have to do so if their committees thought they would benefit from additional core Anthropology training. Such elective work can be completed in the fourth and, in exceptional cases, in the fifth semester. Students entering the combined program with a prior Master’s degree may petition for course reductions (up to three courses for degrees received outside of Yale). In cases where equivalent graduate course work in theory or research design and methods can be demonstrated the corresponding requirement in Anthropology may be waived upon recommendation of the student’s advisory committee.
Appendix D

Addendum to the Yale Anthropology Graduate Student Handbook, Approved by the Faculty on April 19, 2011

Fieldwork

Most graduate students in the Department complete an extended stretch of fieldwork as part of their dissertation research. Graduate students doing fieldwork are expected to:

• Comply with all Yale University guidelines for research, as well as those of their grant-giving agencies

• Conduct research in accordance with the statements on ethics adopted by the Society for American Archaeology, the American Anthropological Association, the American Association of Physical Anthropologists, or other appropriate professional body

• Familiarize themselves with Yale’s travel guidelines (http://world.yale.edu/travel) and register all international travel

• Register with the local embassy of the country in which they hold citizenship, when appropriate and possible

• Communicate with their Departmental advisers on a regular basis, at intervals agreed upon in advance, as well as in the case of emergency or events that might reasonably cause concern

Anthropological fieldwork is, by its nature, often unpredictable. Although it often goes smoothly, the Department recognizes that even when fieldworkers follow all appropriate regulations and guidelines, they may find themselves in difficult and sometimes dangerous situations. Examples include illness or family emergencies, political instability or outright conflict, sexual harassment or other forms of verbal or physical intimidation, and natural disasters. No single policy or method of preparation can anticipate all of these difficulties nor all of the appropriate responses. However, the Department encourages students to prepare actively for the potential difficulties of fieldwork, both before and during time in the field. Examples of good ways to do this include:

• When appropriate, consulting travel advisories issued by the US State Department or international agencies

• Establishing reliable primary and secondary emergency contacts

• Talking about these issues with advisers, other faculty, fellow students, and other experts (at Yale and beyond), including those who are well versed in the particularities of the relevant research area
• Making an ongoing habit of reflecting on the larger contexts in which one’s fieldwork takes place (political, gendered, economic, academic, ethnic, cultural, etc.) and the difficulties that these dynamics might present

• Reflecting on and discussing with others the ways in which one’s own drive to “get the data” might, in certain contexts, interfere with prudent decision-making.

In cases where a student’s adviser is not an appropriate interlocutor on any of these issues, students should consult with the Chair, DGS, or other appropriate university administrator.
